Hi,

Actually i'm having problems when i try to compile the kernel with the las openvz stable patch... The message is:

```
[...]
CC      kernel/ub/io_acct.o
kernel/ub/io_acct.c:461: error: unknown field 'fops' specified in
initializer
kernel/ub/io_acct.c:461: warning: missing braces around initializer
kernel/ub/io_acct.c:461: warning: (near initialization for
'bc_ioacct_debug_entry.u')
kernel/ub/io_acct.c:461: warning: initialization from incompatible
pointer type
make[3]: *** [kernel/ub/io_acct.o] Error 1
make[2]: *** [kernel/ub] Error 2
make[1]: *** [kernel] Error 2
make[1]: se sale del directorio `/usr/src/linux-2.6.18'
make: *** [debian/stamp-build-kernel] Error 2
```

Any help to fix this issue?

Thanks.

Looks like you are using 028stab033. Was the patch applied correctly and fully?

Yes, i try the patch that come in debian etch first and don't work.. Then i try the last patch stable and have this issue.

Thanks.

But what kernel sources did you use? Vanilla or Debian one? Can you please check carefully, were there any rejects/fuzzes while applying the patch?

HTH,  
Vasily.

try setting CONFIG\_UBC\_DEBUG\_IO to n in your .config file  
or applying the attached patch.

Thanks,  
Kirill

Well, this fix that problem and now i have another:

```
LD [M] lib/zlib_deflate/zlib_deflate.o  
Building modules, stage 2.  
MODPOST  
WARNING: "ub_sock_getwres_other" [net/unix/unix.ko] undefined!  
make[2]: *** [__modpost] Error 1  
make[1]: *** [modules] Error 2  
make[1]: se sale del directorio `/usr/src/linux-2.6.18'  
make: *** [debian/stamp-build-kernel] Error 2
```

Maybe i should try the 2.6.20? Or continue with this?

Thanks.

Hmmm... you are the first user I see compiling with CONFIG\_UNIX=m :)

So 2 fixes:

- set CONFIG\_UNIX=y
- simple patch attached :)

Thanks,  
Kirill

Thanks, that works ... The openvz don't initialize at the boot but  
i think i need to edit the config...

Thanks again.

you can check this page for OpenVZ related options:  
[https://wiki.openvz.org/Kernel\\_configuration](https://wiki.openvz.org/Kernel_configuration)

Feel free to ask questions and thanks for your reports!

Kirill
