Hi!,

How can I see the CPU utilization of each VPS over the Hardware Node.

The command 'vzcpucheck' only display the amount of cpuunits for each VPS, but I can't see if any VPS is using the CPU strongly.

Thank you, very much.

Hello

run something like this on hw node:

```
for ve in `vzlist -H -o vpsid`; do echo "VE$ve"; vzctl exec $ve cat /proc/loadavg; done
```
