Hello,

I've just got a new node and while benchmarking it it just died.

Linux xx01.myvps.biz 2.6.18-8.1.4.el5.028stab035.1PAE #1 SMP Sat Jun 9 02:27:12 MSD 2007
i686 athlon i386 GNU/Linux

<http://members.dslextreme.com/users/andylee/unixbench-4.1.0-wht.tar.gz>

Jun 13 15:22:19 xx01 kernel: EDAC k8 MC0: general bus error: participating processor(local node response), time-out(no timeout) memory transaction type(generic read), mem or i/o(mem access), cache level(generic)

Jun 13 15:22:19 xx01 kernel: EDAC MC0: CE page 0x37c31, offset 0xec0, grain 8, syndrome 0x10, row 0, channel 0, label "": k8_edac

Jun 13 15:22:19 xx01 kernel: EDAC MC0: CE - no information available: k8_edac Error Overflow set

Jun 13 15:22:19 xx01 kernel: EDAC k8 MC0: extended error code: ECC error
