Subject: sysfs entries inside VE
Posted by Christian Kaiser2 on Tue, 26 Jun 2007 14:34:35 GMT

Hi all,

I wanted to know how the sysfs inside a VE is managed. I had a look at the
init_ve_sysfs() in kernel/ve/vecalls.c but it is really hard for me to read
the code. Want I want to do is to have a copy of some necessary sysfs
entries of the host system that are used by libspe2 so that I can use
libspe2 inside a VE. Necessary for me are the directories including their
subdirectories and files of:

    /sys/devices/system/cpu
    /sys/devices/system/spu

I found this comment twice in the function I mentioned above "/* ick, this
is ugly, the things we go through to keep from showing up in sysfs...
*/"... so let me do another dirty hack!!
