Subject: Help with OpenVZ forum password reset
Posted by joelee on Mon, 02 Jul 2007 15:37:17 GMT

I have an account created on the OpenVZ forum which I seem to have forgotten my password. I try to do the reset password procedure on the site BUT the email never gets sent to my email address - No errors reported either.

So, I thought that was strange and try to create a new account with a different email address and even the registration process I am not getting email to validate the account. I know my emails work as my first account is getting regular mail from the mailing list.

Hope someone from OpenVZ can help look into this - Thanks!

Joe
