Hi @ all,  
I have to backup all my Data today because of HDD errors.  
I tried to backup every partition by using tar.  
I get the following errors:

...  
tar: ./lib/vz/private/101/var/spool/postfix/private/virtual: socket ignored  
tar: ./lib/vz/private/101/var/run/cgisock: socket ignored  
tar: ./lib/vz/private/101/dev/log: socket ignored

...  
Will my VE work after extractig the archiv?
