
Subject: containers mini-summit?

Posted by [serge](#) on Wed, 08 Aug 2007 17:47:57 GMT

[View Forum Message](#) <> [Reply to Message](#)

I just sent the next (final) version of the containers development roadmap. Eric Biederman and Paul Menage will be at kernel summit representing this work.

We had planned on having a containers mini-summit the day before the kernel summit. However interest in that appears as though it may be too low to justify having a real mini-summit.

So we have a few options:

1. we could have a mini-summit purely by phone.
2. there is a possibility of using a part of a conference room from LCE, if attendance will be low. However, having a phone line to include those who cannot attend would be unlikely.
3. if there is a large planned attendance, we could continue to seek a separate venue for the mini-summit.

Who is interested in (a) attending the mini-summit in person, (b) attending the mini-summit by phone, or (c) not interested?

For those interested in attending, what would you expect to happen at the mini-summit? a) discuss the roadmap to ensure everyone is properly represented at the summit b) go over pieces of functionality from the roadmap and discuss implementation options, who is interested in working on what, and possible timelines. c) something else.

thanks,
-serge

I think given the short time that is left for doing travel etc.
(considering it is long weekend here in USA) it will be tough to do this
in person.

I will be interested in attending this on phone though (and will have
couple more folks from Google join in).

Since Eric/Paul will be attending the KS and giving them an update, it
will be very useful if we can all agree on some set of features that
will be useful for containers and for which we need 1- input from folks
in KS and 2- let them know that this is high on priority list.

I will be there in person.

I think it would be good if someone makes a short presentation of
what is already done and what is being developed now so that we all
can have an overall picture in sight.

Still waiting to hear whether anyone other than yourself, Eric, and Paul would be there... If not, I assume you could meet in one of your hotel rooms and dial into the phone meeting? :)

Hmm, so in front of the current 'roadmap' you'd like to see a list of what's been accomplished so far?

I suppose that might be a good way of showing the community that this is all work in progress and going along nicely, not brand-new development. Pavel, do you mind writing that up?

Eric, do you mind at the mini-summit (or mini-summit phone call) going over what you were going to present at the kernel summit?

thanks,
-serge

Well, actually, I'd prefer meeting in person even if there will be

only 4 people. Talking tete-a-tete is always better than phone-a-phone :)

Except for to meet in some cafe/park in case not many people come.

Not exactly. The entire picture. E.g. I have no idea of what is going on with network namespaces and checkpoint/restart. I'd also like to know what people think about the kernel memory resource management that was discussed long ago and some more questions.

> I suppose that might be a good way of showing the community that this is

> Pavel, do you mind writing that up?

I do not :) I do not even mind making a presentation and showing it up in the mini-summit, but as I have told I haven't got a complete picture of what's happening. Actually I admitted that everyone has some gaps in their knowledges about the overall situation and thought that the person, responsible for this presentation would spend some time collecting the information from other people :)

We could certainly come up with a set of 'status updates' if people

would like that. I.e.

pidns updates - Pavel/suka
netns updates - Eric/Daniel/Benjamin
task containers - Paul
memory container - Balbir
memory checkpoint - Dave
what do vserver/openvz want to see upstream next - Herbert/Kirill
etc

Also if people are interested we could try to do something like that every 1 or 2 months, presumably by phone most of the time, though we could try to always sync it with some conference or other and see whether a few people can meet in person just for fun.

Ok so far we have Pavel, Kir, Kirill, and hopefully Eric, Paul, and
Cedric. Balbir, did I hear a rumor that you might be able to go?

That may be getting too large for a hotel room :)

Would one of you folks definitely going be willing to pick up where I
left off in trying to get time in a room at LCE? Let me know and I'll
send you the name of the person I'd contacted (once I find it again...)

(Still that only really works if we can get someone to show up with an ip
speakerphone so the rest of us can dial in.)

thanks,

No, I won't be there. If I'm not going as KLS attendee, then I won't have a visa :/

Kirill

Thanks. I will prepare some presentation. BTW, maybe we can organize some kind of containers BoF on the conference itself to make other people come and listen. Maybe this will attract more developers to the virtualization? In this case the presentation may be more descriptive.

Great, thanks.

By 'the conference itself' do you mean LCE? That might be worth a shot.

thanks,

-serge

Exactly. I think that other people may find it interesting.

Thanks,
Pavel

Hi all,

[very brief intro: I'm with the Zap project; finally have time to join the discussions after a short period of passively watching the list]

There is a good chance I'll be passing nearby, and that would be an excellent opportunity for me to personally meet those who plan to attend, as well as kick-start Zap's involvement, mainly focusing on checkpoint/restart.

I'm not sure if there is already a set date for the mini-summit; I recall the 3rd or 4th were suggested. Since I'll be in transit, it will be helpful to set one so I can plan accordingly. So if not set yet, I vote for the earliest possible (2nd, 3rd or 4th).

Hi, Serge,

I am still catching up with email, yes, I am going to attend the kernel and vm summit.
