I can't seem to figure out wiki formatting. I added a wiki howto entry for migrating a VE from one HN to another. However, I cannot seem to get the formatting correct so it displays worth a damn. Could someone fix that for me?

It's just that you have to use pre instead of code for multi-line verbatim text such as console logs. I have fixed that for you already.

Now it's time to separate the text into subsections, here's how:
