[View Forum Message](#) <> [Reply to Message](#)

---

HN1 mount NAS:/exports/www /vz/root/100/var/www VE100 apache server  
HN2 mount NAS:/exports/www /vz/root/101/var/www VE101 developer ssh/ftp access

PS.

Though, as sad by Vasily, some details are needed. There is no useful information in your request.

1. could you provide your /etc/exports on the server side and information what server you are using
2. Plz provide  
cat /proc/mounts on both VEs
3. Could you provide more detailed how you change files and verifies that the change have taken place? Simple  
echo aaa > file  
and subsequent content file verification does not have the problem you report

Regards,  
Den
