Do you have some troubles in cman compilation? Could you please describe it in details?

i try to compile cluster source from redhat

cvs -d :pserver:cvs@sources.redhat.com:/cvs/cluster

on CENTOS4.5 or CENTOS 5.0

but i have multiple errors

exemple of error in CENTOS 4.5 :

```
make -C gnbd-kernel/src all
make[1]: Entering directory `/usr/src/kernels/cluster/gnbd-kernel/src'
make -C /lib/modules/`uname -r`/build M=/usr/src/kernels/cluster/gnbd-kernel/src
symverfile=/lib/modules/`uname -r`/build/Module.symvers modules USING_KBUILD=yes
make[2]: Entering directory `/usr/src/kernels/2.6.9-55.EL-smp-x86_64'
  CC [M] /usr/src/kernels/cluster/gnbd-kernel/src/gnbd.o

make: *** [gnbd-kernel] Error 2
```

i don't understand how to do to compile a kernel with openvz, drbd 0.8 , cluster suite from redhat , GFS ...
