hi,

i have problem on my VEs.

how can i give access to network on my VEs?

my server os is debian 4 stable.

please help me.

First of all, please, ask right questions. Second, always look into doc's before asking anything:

[http://wiki.openvz.org/Virtual\\_network\\_device](http://wiki.openvz.org/Virtual_network_device)

hi,

i use this article to installing openvz on debian:

[http://wiki.openvz.org/Installation\\_on\\_Debian](http://wiki.openvz.org/Installation_on_Debian)

i can create VEs successfull but my VEs can not access to network and on ping give me error.

[root@vps101 /]# ping www.yahoo.com

ping: unknown host www.yahoo.com

did you set the nameserver?

vzctl set 101 --nameserver 1.2.3.4 --save
