hi,
i have problem on my VEs.
how can i give access to network on my VEs?
my server os is debian 4 stable.
please help me.

First of all, please, ask right questions. Second, always look into doc's before asking anything:

http://wiki.openvz.org/Virtual_network_device

hi,
i use this article to installing openvz on debian:
http://wiki.openvz.org/Installation_on_Debian

i can create VEs successfull but my VEs can not access to network and on ping give me error.

```
[root@vps101 /]# ping www.yahoo.com  
ping: unknown host www.yahoo.com
```

did you set the nameserver?

```
vzctl set 101 --nameserver 1.2.3.4 --save
```
