hi
is there any fresh way to limit Bw of an ve?
thanks

You can use tc to limit the bandwidth, check the wiki:
http://wiki.openvz.org/Traffic_shaping_with_tc

:nice:
but is there any way to limit both of in-coming and out-going data in on rule!?
for example:
150 gig at all.
by tc limit must have to rule,1- for incoming BW and other for out going BW

TNX
