Subject: No any quotas !
Posted by xakmak on Wed, 05 Sep 2007 10:03:09 GMT

Hi all! I have decided to move some VEs to another partition (another /vz) i have made partition, format as ext3, and mount it on /vz2 mountpoint.

Than i copied data to /vz2/private/$VE from /vz/private/$VE

and change VE.config-
VE_ROOT="/vz/root/$VEID"
VE_PRIVATE="/vz2/private/$VEID"

than start VE.
Started succesfully and works, but there is no any quotas inside VE and "df" command inside VE showed me node's disk capacity not VE disk quota!.

How can i fix this problem on another than /vz partition ?
