hello

i'm anew user using openvz i want know some thing

now i'm add ip " vzctl set 2 --ipadd 74.86.99.500 --setmode restart --save "

i want know how can i delete this ip

another question

Sample configuration file for VPS based on OS template

#<agent>: redhat-9 with Plesk Server Administrator 7 application template

#

```

and i'm set up cpanel

when i see in memory

	total	used	free	shared	buffers	cached
Mem:	2097152	400968	1696184		0	0
-/+ buffers/cache:		400968	1696184			
Swap:	0	0	0			
Total:	2097152	400968	1696184			

see swap is zero i have swap drive 12 gb in my server i want know how can i mount swap in vps

best regards

Alaa elden

1. vzctl set \$VEID --ipdel all --save

2. If meminfo is virtualized (see man vzctl, --meminfo description), swap is not shown in /proc/meminfo and/or free output. That does not mean there's no swap or VE can't use swap; it's just that its size is hidden from VE.

thanks Kir for ur help

now i'm type " cat /proc/meminfo "

```
MemTotal:    4139044 kB
MemFree:     327076 kB
Buffers:     237680 kB
Cached:      3078872 kB
SwapCached:    8 kB
Active:       1795844 kB
Inactive:     1712808 kB
HighTotal:    786432 kB
HighFree:     208000 kB
LowTotal:     3352612 kB
LowFree:      119076 kB
SwapTotal:    15727624 kB
SwapFree:     15727616 kB
Dirty:        4 kB
Writeback:    0 kB
Mapped:       189456 kB
Slab:         256260 kB
CommitLimit: 17797144 kB
Committed_AS: 539148 kB
PageTables:   3864 kB
VmallocTotal: 303096 kB
VmallocUsed:  27776 kB
VmallocChunk: 274888 kB
```

this resulte i want swap drive mount in all vps
i hope u understand me

Again, swap is enabled and working for all VEs, it's just not showing in meminfo/free by default.

thanks kir sorry

i want make it show in meminfo/free

Does it helps if you disable meminfo virtualization, i.e.

vzctl set \$VEID --meminfo none --save

?

kir u are very professional

very thanks this i need now swap appeared in free

now it virtualized in vps " --meminfo none --save "

what another option " --meminfo ?? --save

thanks again
