Don't worry, it's ok.

<http://lwn.net/Articles/14294/>

Documentation/networking/ip-sysctl.txt:

...

use_tempaddr - INTEGER

Preference for Privacy Extensions (RFC3041).

<= 0 : disable Privacy Extensions

== 1 : enable Privacy Extensions, but prefer public
addresses over temporary addresses.

> 1 : enable Privacy Extensions and prefer temporary
addresses over public addresses.

Default: 0 (for most devices)

-1 (for point-to-point devices and loopback devices)

...
