Hi all,

I'm not exactly sure on the format I'm supposed to submit patches in, so I'll just follow what everybody else is doing.

Patch from Jason (jstubbs@work-at.co.jp):  
This patch virtualizes the ipt\_REDIRECT iptables module.

Jason,

I fixed error path in do\_ve\_iptables().  
Here is the patch which is committed in 2.6.8.  
It will be also committed in coming 2.6.16.

Thanks,  
Kirill
