
Subject: [PATCH] Merge sys_clone() and sys_unshare() nsproxy handling
Posted by [Badari Pulavarty](#) on Tue, 27 Feb 2007 00:40:16 GMT
[View Forum Message](#) <> [Reply to Message](#)

Hi,

sys_clone() and sys_unshare() handles copy/clone of nsproxy and its associated namespaces differently.

This patch merges all the handling into common functions (as much as possible).

Please review. If no objections, I would like to submit for inclusion into -mm.

Ran standard LTP tests, unshare uts, ipc tests fine.

Thanks,
Badari

Merge sys_clone/sys_unshare nsproxy and namespace copy handling.

- Create a new nsproxy and its associated namespaces and pass it back to caller to attach it to right process.

- Changed all copy_*_ns() routines to attach the namespace to passed in new nsproxy instead of task->nsproxy.

- Get rid of all individual unshare_*_ns() routines and make use of copy_*_ns() instead.

Subject: Re: [PATCH] Merge sys_clone() and sys_unshare() nsproxy handling
Posted by [serue](#) on Tue, 27 Feb 2007 05:05:46 GMT
[View Forum Message](#) <> [Reply to Message](#)

Quoting Badari Pulavarty (pbadari@us.ibm.com):

- > Hi,
- >
- > sys_clone() and sys_unshare() handles copy/clone of nsproxy
- > and its associated namespaces differently.
- >
- > This patch merges all the handling into common functions
- > (as much as possible).
- >
- > Please review. If no objections, I would like to submit for
- > inclusion into -mm.

Thanks, Badari, this looks great. Barring failures in the set of tests I just fired off, I'd love to see this merged.

thanks,
-serge

- > Ran standard LTP tests, unshare uts, ipc tests fine.
- >
- > Thanks,
- > Badari

```

It would be nice if you could in the same move make the get_*_ns()
routines consistent.

thanks,

C.
