The latest OpenVZ RHEL5 kernel for x86_64 available for download from
<http://openvz.org/download/kernel/rhel5/> is
ovzkernel-2.6.18-8.1.8.el5.028stab039.1.x86_64.rpm.

What is the best way to obtain a newer OpenVZ kernel based on RHEL5
kernel-2.6.18-8.1.14.el5.x86_64.rpm?
