Hello. After applying the 039 tun/tap patch for online migration, I get this error:

Setting up checkpoint...
    join context..
    dump...
Can not dump VE: Invalid argument
unsupported chrdev 10/200
Checkpointing failed
Error: Failed to dump VE

What could be wrong?
Thank you!

Hello.

yes, we've also noticed problems with migration the OpenVNP inside a VE with that patch applied.
Work in progress, please, watch the bug 642 (http://bugzilla.openvz.org/show_bug.cgi?id=642),
we'll post updates there.

Thank you for the report.
