i'm sorry, but you can't use pptp protocol from inside VE because the ppp module is not virtualized at the moment, you can check the bug [http://bugzilla.openvz.org/show\\_bug.cgi?id=268](http://bugzilla.openvz.org/show_bug.cgi?id=268)

At the same time if you need ppp to setup a VPN, you can use another VPN implementation - OpenVPN. It does not use pptp, it uses tun/tap devices instead.  
<http://wiki.openvz.org/VPN>

Best regards,  
Konstantin.
