
Subject: * SOLVED * Device eth0 has different MAC address than expected

Posted by [vz10b4](#) on Tue, 04 Apr 2006 15:06:52 GMT

[View Forum Message](#) <> [Reply to Message](#)

Hi folks,

I installed ovzkernel-smp-2.6.8-022stab072.2.x86_64.rpm on my RHEL4 update 3 with kernel 2.6.9-34ELsmp. Configured GRUB according to the documentation and did a reboot. During reboot I got:

Device eth0 has different MAC address than expected, ignoring.

Removed the HWADDRESS line ifcfg-eth0 and restarted the network and got below message:

e1000 device eth0 does not seem to be present, delaying initialization.

ifconfig shows only the loopback interface (only got one nic)

lsmod showed that e1000 is loaded.

modprobe.conf shows "alias eth0 e1000"

dmesg | grep eth0 gave zero output

modprobe -r eth0 and then modprobe eth0 with no success

Restarted to the original RHEL4 kernel and Kudzu found new HW (e1000) and I configured the nic again and it was working okay again.

So I am lost what should I do now?

Kind Regards

Fredrik

Hi again,

Did install a 3com 3c905C-TX that works and is recognized by kudzu under the openvz kernel and the RHEL4 kernel. I configured it as eth0 but my eth1, Intel 82573L Gigabit NIC, still has the same problems when booting the openvz kernel. Kudzu does not even find that NIC after I removed it from the configuration.

I do not know if this helps to solve this issue but I will continue with the trial and error and I am stubborn as a blue pig:-)

Kind Regards

Fredrik

Can you please attach the output of dmesg after rebooting to OVZ kernel?
also, please, attach output of lspci and lspci -n commands.

it is incomplete :/
is it forum who cut the text or you pasted so?

I got a "Show the rest of the message" command at the bottom of the message.

But to be sure I upload the information as files also.

/Fredrik

Hello Fredrik,

We will update e1000 driver up to RHEL4U3 version, I've submitted bug into our bugzilla:
http://bugzilla.openvz.org/show_bug.cgi?id=131

thank you,
Vasily Averin

Thanks Vasily!

I will wait for the update.

Kind Regards
Fredrik

vz10b4, I uploaded 076 kernel build for you to:
<http://download.openvz.org/~dev/076/>

can you please check that your issue with e1000 is solved?

Subject: Re: Device eth0 has different MAC address than expected

[View Forum Message](#) <> [Reply to Message](#)

Thanks dev!

My e1000 now works without any problems.

Kind Regards
Fredrik
