hi

i have installed OVZ with 2.6.18 kernel. i have know is it possible to enable pp module on it for ve's?

if yes how can i do this!?

thanks!

Hi Milad,

Could you please take a look on the following thread:

[http://forum.openvz.org/index.php?t=msg&th=4272&star t=0&](http://forum.openvz.org/index.php?t=msg&th=4272&start=0&)

and explain me what is "pp module"?

thank you,

Vasily Averin

sorry for wrong post.

my meaning was ppp module!

Hi Milad,

i'm sorry, but you can't use pptp protocol from inside VE because the ppp module is not virtualized at the moment, you can check the bug http://bugzilla.openvz.org/show_bug.cgi?id=268

At the same time if you need ppp to setup a VPN, you can use another VPN implementation - OpenVPN. It does not use pptp, it uses tun/tap devices instead.

<http://wiki.openvz.org/VPN>

Best regards,

Konstantin.
