Red Hat has released a new RHEL5 kernel with important security updates.

Will the OpenVZ team be building a new OpenVZ kernel based on RHEL5
kernel-2.6.18-8.1.15.el5.x86_64.rpm?

Subject: Re: OpenVZ kernel based on

RHEL5 kernel-2.6.18-8.1.15.el5.x86_64.rpm?

will be built in a couple of hours.

BTW, the following fixes:

linux-2.6-net-igmp-check-null-when-allocate-gfp_atomic-skbs.patch

linux-2.6-misc-bounds-check-ordering-issue-in-random-driver.patch (CVE-2007-3105)

linux-2.6-fs-reset-current-pdeath_signal-on-suid-execution.patch (CVE-2007-3848)

are already in.

Thanks,

Kirill

I've put it preliminary here:

<http://download.openvz.org/~dev/028stab047.1/>

will be publicly available tomorrow after minimal testing.

Thanks,

Kirill
