..I get:  
kernel/pid.c: In function 'free\_pid':  
kernel/pid.c:197: error: dereferencing pointer to incomplete type  
kernel/pid.c: In function 'alloc\_pid':  
kernel/pid.c:233: error: dereferencing pointer to incomplete type  
make[2]: \*\*\* [kernel/pid.o] Error 1  
make[1]: \*\*\* [kernel] Error 2

is this expected?

Dariush,

1. are the sources taken from .src.rpm or git?
2. plz attach your config so that we could check onsite.

Kirill

I downloaded this:

<http://download.openvz.org/kernel/branches/2.6.18/028stab045.1/patches/patch-ovz028stab045.1-combined.gz>

and applied it to clean 2.6.18 ( not 2.6.18.8, as previous patch had such requirement )

> 2. plz attach your config so that we could check onsite.  
attached

Thanks! will commit it today.

Thanks,  
Kirill

<http://download.openvz.org/kernel/branches/2.6.18/028stab045.1/patches/patch-ovz028stab045.1-combined.gz>  
... just a note to memory - looks like 028stab047.1 has been released the same day, and it looks like it missed this commit, as it doesn't compile with:

```
kernel/pid.c: In function 'free_pid':  
kernel/pid.c:197: error: dereferencing pointer to incomplete type  
kernel/pid.c: In function 'alloc_pid':  
kernel/pid.c:233: error: dereferencing pointer to incomplete type  
make[2]: *** [kernel/pid.o] Error 1  
make[1]: *** [kernel] Error 2  
(and the patch mentioned earlier still fixes this)
```

regards,

yep, as I mentioned in bug:  
[http://bugzilla.openvz.org/show\\_bug.cgi?id=689](http://bugzilla.openvz.org/show_bug.cgi?id=689)  
it is fixed in 028stab048

Thanks,  
Kirill
