..I get:
kernel/pid.c: In function 'free_pid':
kernel/pid.c:197: error: dereferencing pointer to incomplete type
kernel/pid.c: In function 'alloc_pid':
kernel/pid.c:233: error: dereferencing pointer to incomplete type
make[2]: *** [kernel/pid.o] Error 1
make[1]: *** [kernel] Error 2

is this expected?

Dariush,

1. are the sources taken from .src.rpm or git?
2. plz attach your config so that we could check onsite.

Kirill

I downloaded this:

<http://download.openvz.org/kernel/branches/2.6.18/028stab045.1/patches/patch-ovz028stab045.1-combined.gz>

and applied it to clean 2.6.18 (not 2.6.18.8, as previous patch had such requirement)

> 2. plz attach your config so that we could check onsite.
attached

Thanks! will commit it today.

Thanks,
Kirill

... just a note to memory - looks like 028stab047.1 has been released the
same day, and it looks like it missed this commit, as it doesn't compile
with:

kernel/pid.c: In function 'free_pid':
kernel/pid.c:197: error: dereferencing pointer to incomplete type
kernel/pid.c: In function 'alloc_pid':
kernel/pid.c:233: error: dereferencing pointer to incomplete type
make[2]: *** [kernel/pid.o] Error 1
make[1]: *** [kernel] Error 2
(and the patch mentioned earlier still fixes this)

regards,

yep, as I mentioned in bug:
http://bugzilla.openvz.org/show_bug.cgi?id=689
it is fixed in 028stab048

Thanks,
Kirill
