hello i am need to upgrade some of my VE to FC6 they are on FC4 right now and when i tried using yum it gave me this error

initscripts conflicts with kernel < 2.6.12

i am using the latest stable openvz kernel 2.6.18-8.1.14.el5.028stab045.1 #1 SMP Mon Oct 1 13:22:25 MSD 2007 i686 i686 i386 GNU/Linux

can anyone help?

Hi,

1. Sorry for delay!
2. The message "initscripts conflicts with kernel < 2.6.12" means that there is a package, that provides kernel capability and it's version lower than new initscripts requires.
3. Please, delete old (version < 2.6.12) packages, that provide kernel capability and try again. That may be kernel or dummy packages.
4. "rpm -q --whatprovides kernel" helps you to observe such packages.

Thank You!

i ran that command on the host node and this is all i got

ovzkernel-2.6.18-8.1.14.el5.028stab045.1

i'll run it on the ve i am upgrading to show

dummy-fedora-core-4-1.0-3.swsoft

is what is on there how do i upgrade it?

Hi,

1. I suppose, that you want to use yum inside VE to upgrade it.
2. Go inside VE and remove dummy-fedora-core-4-1.0-3.swsoft package.
3. Try to yum update.

Thank You!
