Subject: Would IPSec work, with a custom compiled kernel?

---

Is it possible to run IPSec on an OpenVZ VPS? I read some old post that said it was not possible, however, in the roadmap it is mentioned so I would like to know how far we are with that?

I mostly want to test the OpenVPN vs IPSec performance and ease of use for the end client and hopefully offer them both, and perhaps add PPTP to the mix...

Tomas
