Hi,

I am trying to compile the 2.6.22 kernel from kernel.org on ubuntu 7.10.  
it fails in  
mm/built-in.o: In function `out\_of\_memory':  
/usr/src/linux-2.6.22/mm/oom\_kill.c:435: undefined reference to `show\_slab\_info'  
mm/built-in.o: In function `allocate\_slab':  
/usr/src/linux-2.6.22/mm/slub.c:1152: undefined reference to `inc\_cache\_grown'  
mm/built-in.o: In function `free\_slab':

I have file a bug report on mozilla:[http://bugzilla.openvz.org/show\\_bug.cgi?id=711](http://bugzilla.openvz.org/show_bug.cgi?id=711)  
including a copy of the .config file

is anybody able to help on this?.

Thanks
