Subject: /dev/empty after reboot VZ centos 4
Posted by afrare on Thu, 01 Nov 2007 10:16:07 GMT

Dear Friends,

I installed host CENTOS 4 OPEN VZ kernel 2.6.9-023stab044.11 and work perfect.

I installed VZ guest centos 4 but sometimes after reboot guest machine the directory /dev is empty and SSH server don't work more.

I copied directory VE work /dev to VE don't work /dev but SHHD servce don't work.

Thanks for help.

Adriano
