
Subject: [PATCH 1/7] uts namespaces: introduce temporary helpers

Posted by [serue](#) on Sat, 08 Apr 2006 04:52:06 GMT

[View Forum Message](#) <> [Reply to Message](#)

Define utsname() and init_utsname() which return &system_utsname.
Users of system_utsname will be changed to use these helpers, after
which system_utsname will disappear.
