Hi,

1. Quote:this sample config ram 512MB
I suppose that your statement based on this string
Quote:PRIVVMPAGES="131072:139264"
But PRIVVMPAGES not the RAM but the virtual memory restriction and it may be RAM or SWAP.

By the way have you read the wiki pages about UBS parameters? If not please visit this pages
https://wiki.openvz.org/UBC_parameters_table
And it is very useful
https://wiki.openvz.org/UBC_systemwide_configuration

Thank You!
