Hi,

When i create a new VE, the nameserver is your ip address.

I want change the ip nameserver for the new VE

Thanks

Hi,

in VE , edit the /etc/resolv.conf

or from VE0 (=hardwarenode)

```
# vzctl set <VEID> set --nameserver <IP_DNS_1> --nameserver <IP_DNS_2> ... --searchdomain  
<name> [--save]
```

More options are listed in manpage of vzctl!

Thank you

My question is very stupid
