
Subject: New kernels... which to use?

Hi,

I just realized that there are options in openvz.repo.

openvz-kernel-rhel5 seems to be the default, but openvz-kernel-2.6.20 and 2.6.22 are above it...
What is best to use?

Assume I don't have any special requirement except that I like using fuse-sshfs.

Regards,

Ugo

Hi Ugo,

2.6.20 and 2.6.22 -- are development branches, we're using it for porting OpenVZ patches to latest mainstream kernels.

For production I would recommend to use rhel5-based kernels.

thank you,
Vasily Averin

Oh, it is clearer now, but the comments in openvz.repo could be more explicit.

Thanks!

Ugo
