Hello ev1, can i install openvz in my centos 3?? is using the kernel:

Linux server.domain.net 2.4.21-47.EL #1 Tue Aug 1 08:56:24 EDT 2006 i686 i686 i386 GNU/Linux

I was looking for availables kernel but i could not saw nothing about this SO.

Regards!.

I don't think that is possible. OpenVZ only runs on 2.6 kernels.

I don't think they modify the kernel that much... You should be fine.

Well , i did it, at first time the only problem is i can not load the ntfs module into the kernel :S, are there any patch to fix it ?

Regards!

Hello.

well, prebuilt OpenVZ kernels available on openvz.org are compiled with option "# CONFIG_NTFS_FS is not set", so to _try_ using NTFS unfortunately you have to recompile the kernel.

i wrote _try_ because we have not checked it if it works.

P.S. modules can be loaded in Hardware Node only. It does not mean that you can use functionality of the module in HN only, but you must load the module from HN.
