[quote title=dev wrote on Thu, 06 December 2007 03:08]tgasoft wrote on Thu, 06 December 2007 11:00...

"As an alternative to creating a cache using template metadata, you can use precreated template cache taken from Downloads » Templates » Precreated, or directly from download.openvz.org/template/precreated, or from one of the mirrors.

However, this option is not recommended for production systems since without installing template metadata you will not be able to update your template cache. "
