From vz.conf:

```
VE_ROOT=/vz/root/$VEID  
VE_PRIVATE=/vz/private/$VEID
```

What if I would like to have one VE on another drive? Can I set those variables in /etc/vz/conf/\$VEID.conf?

Regards,

Ugo

Well, try yourself, ask questions afterward.

Btw. you can also use symbolic links.

It's not always possible to test.

Nevermind, I found the answer in the manual, page 84. I have read the manual some time ago, I guess I'm due for another read.
