From what I can see, the lastest version available is 3.0.18-1

<http://download.openvz.org/utls/vzctl/>

Where did you see that 3.0.20 was available?

Ugo

i see it in GIT it released

<http://git.openvz.org/?p=vzctl>

thanks ugob

i found it i will make it from source and add patch it will done like this

```
./configure  
make  
make install
```

i'm correct ?

thanks

I guess so.

I don't know how openvz release their packages, but I use yum/rpm to install/update my packages.

Is there a specific feature you were looking for in 3.0.20 that pushes you to use the source?
