---

I'm following <http://www.sisd.com/mediawiki/index.php/Freeside:1.7:Documentation:InstallingOnCentOS4.4> with exceptions where necessary for my virtual server. I'm no expert on the virtual server, nor Linux overall.

I downloaded the file in both my host server and virtual server.

from the virtual server:Quote:[root@freeside-centos4 ~]# rpm -ivh /tmp/rpmpforge-release-0.3.6-1.el4.rf.i386.rpm  
rpmdb: Program version 4.2 doesn't match environment version  
error: db4 error(22) from dbenv->open: Invalid argument  
error: cannot open Packages index using db3 - Invalid argument (22)  
error: cannot open Packages database in /var/lib/rpm  
warning: /tmp/rpmpforge-release-0.3.6-1.el4.rf.i386.rpm: V3 DSA signature: NOKEY, key ID 6b8d79e6  
rpmdb: Program version 4.2 doesn't match environment version  
error: db4 error(22) from dbenv->open: Invalid argument  
error: cannot open Packages database in /var/lib/rpm

from the host server:Quote:[root@Char ~]# vzrpm 114 -ivh /tmp/rpmpforge-release-0.3.6-1.el4.rf.i386.rpm  
exec /bin/rpm --root /vz/root/114 -ivh /tmp/rpmpforge-release-0.3.6-1.el4.rf.i386.rpm  
warning: /tmp/rpmpforge-release-0.3.6-1.el4.rf.i386.rpm: Header V3 DSA signature: NOKEY, key ID 6b8d79e6  
Preparing... ##### [100%]  
1:rpmpforge-release ##### [100%]  
rpmdb: Program version 4.2 doesn't match environment version  
error: db4 error(22) from dbenv->open: Invalid argument  
error: cannot open Packages index using db3 - Invalid argument (22)  
error: cannot open Packages database in /var/lib/rpm  
error: /etc/pki/rpm-gpg/RPM-GPG-KEY-rpmpforge-dag: import failed.  
rpmdb: Program version 4.2 doesn't match environment version  
error: db4 error(22) from dbenv->open: Invalid argument  
error: cannot open Packages index using db3 - Invalid argument (22)  
error: cannot open Packages database in /var/lib/rpm  
error: /etc/pki/rpm-gpg/RPM-GPG-KEY-rpmpforge-dries: import failed.  
rpmdb: Program version 4.2 doesn't match environment version  
error: db4 error(22) from dbenv->open: Invalid argument  
error: cannot open Packages index using db3 - Invalid argument (22)  
error: cannot open Packages database in /var/lib/rpm  
error: /etc/pki/rpm-gpg/RPM-GPG-KEY-rpmpforge-matthias: import failed.

Ideas?

You should try installing the latest version:

<http://dag.wieers.com/rpm/packages/rpmforge-release/rpmforge-release-0.3.6-1.el4.rf.i386.rpm>

Have you tried a yum update from within the VE? This looks like rpmdb corruption.

```
[root@Char ~]# vzrpm 114 -qa | grep rpmforge  
rpmforge-release-0.3.6-1.el4.rf
```

Apparently it was already installed, though that doesn't seem like the error I should get if it already was.
