Subject: virtualisation conference with openvz
Posted by raphinou on Tue, 08 Jan 2008 16:06:18 GMT

Hi all

Profoss (http://www.profoss.eu) is organising a European
virtualisation conference on
22 and 23 january in Brussels, you might remember my call for papers.
As Werner Fischer announced on the OpenVZ blog at http://blog.openvz.org/ , he
will be talking about "HA clustering made simple with OpenVZ".

The first day is looking at business impact of virtualisation, and the
second day is
looking at the technical aspects.

Lots of technologies and companies will be present at the event, and
the cost is
really affordable, so I hope to see you there!

Don't hesitate to contact me if you have questions.

Cheers

Raph
