Subject: Upgrade HN
Posted by ugob on Wed, 09 Jan 2008 14:52:45 GMT

Hi,

I have one HN that is running Centos4, with the recommended kernel
(2.6.18-53.el5.028stab051.1PAE). I'm having problem installing zaptel to make MeetMe() work in
asterisk, but I'm having problems since I'm using a el5 kernel on a el4 install.

I originally chose 'minimal install' as intstall time and haven't installed much on this HN. It is only
running the vz service, with a few standard ones (crond, ntpd). Is it safe to upgrade the HN to
centos-5? Using yum, or CD?

Thanks,

Ugo
