Subject: How to find which VPS using excess resources
Posted by whatever on Wed, 09 Jan 2008 17:59:57 GMT

We are facing strange problem with one node. Sometimes the load average shots upto 105%
Is there anyway to find which VPS causing the mess. Is there any alert system which sends email
once the resources are over used by some vps.

Thanks

Hi,

may some wiki pages can help you:

 http://wiki.openvz.org/Monitoring_openvz_resources_using_mun in
 http://wiki.openvz.org/Monitoring_openvz_resources_using_bea nmonitor
 http://wiki.openvz.org/Monitoring_openvz_resources_using_nag ios_and_snmp

Or use package vzprocps, with programs like vztop and vzps.
