Subject: VMWare Server vs OpenVZ
Posted by shuaib85 on Sat, 12 Jan 2008 14:25:19 GMT

Hi guys

As we all know that openvz is using operating system level virtualization. After googling around reading the datasheet and al l the available information on VMWare website I could not manage to know which virtualization technique VMWare server is using. Is it using full virtualization (hypervisor). anyone knows any place where I can find the software and the vz technique e.g openvz os-level

Best regards
Shuaib
