
Subject: [PATCH net-2.6.25 1/4][NETNS][RAW]: Make ipv[46] raw sockets lookup namespaces aware.

Posted by [Pavel Emelianov](#) on Mon, 14 Jan 2008 13:03:55 GMT

[View Forum Message](#) <> [Reply to Message](#)

This requires just to pass the appropriate struct net pointer into `__raw_v[46]_lookup` and skip sockets that do not belong to a needed namespace.

The proper net is get from `skb->dev` in all the cases.
