Hi,  
I'm getting this after upgrade to 3.0.22

```
srvr:/# vzctl stop testlink
Stopping VE ...
VE was stopped
/usr/lib/vzctl/scripts/vps-functions: line 146: [: del: integer expression expected
```

```
ii  vzctl          3.0.22-2           server virtualization
solution - control tools
srvr:/# vzctl start testlink
Starting VE ...
VE is mounted
Adding IP address(es): 192.168.99.82
/usr/lib/vzctl/scripts/vps-functions: line 146: [: add: integer expression expected
```

and this:

```
[ "$1" -eq "add" ]
(test seems to use = for strings and -eq for integers, which is strange,since
 I do recall using -eq specifically for strings)
```

--  
Key fingerprint = 40D0 9FFB 9939 7320 8294 05E0 BCC7 02C4 75CC 50D9  
Total Existance Failure

vzctl source code does not contain such expressions,

\$ fgrep -re '-eq "' . |wc -l

0

Looks like you are testing some patched vzctl build.

Hi Darius,

it's a debian package problem vzctl-3.0.22-2, see:

Debian bug report ->

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=459717> and

OpenVZ bug report -> [http://bugzilla.openvz.org/show\\_bug.cgi?id=780](http://bugzilla.openvz.org/show_bug.cgi?id=780)

Please report this bug to debian bts!

Regards,  
Thorsten
