Hi..!

I have installed ovzkernel-2.6.8-022stab045.1.i686.rpm in SME server 7.3 with 5 hard disks and raid 5 configuration. But when I started booting using the openVZ kernel, I am getting Kernel Panic error . Please help me to solve this issue.

Thanks In advance
Nithin K

Hi, raid5 is compiled static into the kernel. I would use a 2.6.18 release kernel, check out the EL5 release openvz kernel.
