Hello,

I am new on this forum (and OpenVZ) and I am having some trouble setting up openvz user/group quotas inside VE's.

I am trying openvz on 2 servers. On the first one, quotas worked fine (same kernel, but first one is i386 and second one is Core2Duo :

Linux server 2.6.22-ovz005.1 #1 SMP Thu Nov 15 15:35:00 MSK 2007 x86\_64 x86\_64 x86\_64  
GNU/Linux

- usrquota/grpquota are not set on the HN partitions. Is that correct?

```
# vzctl set 151 --quotaugidlimit 100 --save
Configure meminfo: 35000
Setting quota ugidlimit: 100
Saved parameters for VE 151
```

## INSIDE THE VE:

```
# vzctl enter 151
entered into VE 151
goebbels:/# quota
Segmentation fault
```

```
goebbels:/# ls -la /*quota*
lrwxrwxrwx 1 root root 39 Jan 30 19:14 /aquota.group ->
/proc/vz/vzaquota/00000012/aquota.group
lrwxrwxrwx 1 root root 38 Jan 30 19:14 /aquota.user -> /proc/vz/vzaquota/00000012/aquota.user
```

```
goebbels:/# cat /proc/mounts
simfs / simfs rw 0 0
tmpfs /lib/init/rw tmpfs rw,nosuid 0 0
proc /proc proc rw,nosuid,nodev,noexec 0 0
sysfs /sys sysfs rw,nosuid,nodev,noexec 0 0
tmpfs /dev/shm tmpfs rw,nosuid,nodev 0 0
devpts /dev/pts devpts rw,nosuid,noexec 0 0
```

```
goebbels:/# cat /etc/mtab
/dev/simfs / reiserfs rw,usrquota,grpquota 0 0
tmpfs /lib/init/rw tmpfs rw,nosuid 0 0
proc /proc proc rw,nosuid,nodev,noexec 0 0
sysfs /sys sysfs rw,nosuid,nodev,noexec 0 0
tmpfs /dev/shm tmpfs rw,nosuid,nodev 0 0
```

```
devpts /dev/pts devpts rw,nosuid,noexec 0 0
```

```
goebbels:/# repquota -a
```

```
*** Report for user quotas on device /dev/simfs
```

```
Block grace time: 00:00; Inode grace time: 00:00
```

User		Block limits			grace	File limits		
		used	soft	hard		used	soft	hard
root	--	154484	0	0	7984	0	0	
man	--	148	0	0	16	0	0	
news	--	4	0	0	1	0	0	

```
goebbels:/# edquota -u root
```

```
Segmentation fault
```

/vz/private is a separated partition dedicated for VE's. Can i have multiple VE's with user/group quotas on the same partition (/vz/private)?

Any help will be appreciated.

Thanks a lot.

Hi, your commands look sound. I would try the RHEL5 2.6.18 kernel, that is the only thing different between your box and mine.

I can't try an older kernel because they are incompatible with our intel motherboard

I think this is a bug. I was trying quota on 32bits VE's. The HN is 64bits. Now I installed a 64bit VE and quota worked. To make sure this have to do with the problem, i download both ubuntu precreated images (amd64 and i386 - on [openvz.org](http://openvz.org)). Quota works fine on amd64 and does not work on i386.

Here is the last lines of the strace output on a i386 VE:

```
open("/etc/mtab", O_RDONLY) = 3
fstat64(3, {st_mode=S_IFREG|0644, st_size=258, ...}) = 0
mmap2(NULL, 4096, PROT_READ|PROT_WRITE, MAP_PRIVATE|MAP_ANONYMOUS, -1, 0) =
0xb7fdf000
read(3, "/dev/simfs / reiserfs rw,usrquot...", 4096) = 258
statfs64("/", 84, {f_type="EXT2_SUPER_MAGIC", f_bsize=4096, f_blocks=2097152,
f_bfree=2058467, f_bavail=2058467, f_files=800000, f_ffree=791992, f_fsid={-1891294066,
1551446465}, f_namelen=255, f_frsize=4096}) = 0
stat64("/dev/simfs", {st_mode=S_IFBLK|010, st_rdev=makedev(0, 18), ...}) = 0
stat64("/", {st_mode=S_IFDIR|0755, st_size=4096, ...}) = 0
read(3, "", 4096) = 0
close(3) = 0
munmap(0xb7fdf000, 4096) = 0
stat64("/dev/simfs", {st_mode=S_IFBLK|010, st_rdev=makedev(0, 18), ...}) = 0
getuid32() = 0
quotactl(0xd00 /* Q_??? */|USRQUOTA, "/dev/simfs", 0, 0xbfcd49d4) = 0
quotactl(0x900 /* Q_??? */|USRQUOTA, "/dev/simfs", 0, 0xbfcd4e0c) = 0
geteuid32() = 0
quotactl(0xd00 /* Q_??? */|USRQUOTA, "/dev/simfs", 0, 0xbfc94de8) = 0
