Hello all,

I have this problem in 4 hardwares.

My node is RHEL 4 and 5 (64 bits).

I create VM with template :

centos-5-i386-afull.tar.gz

centos-4-i386-afull.tar.gz

I install CPANEL normal. After cpanel installed, services no start (no exist) ... apache, etc.

I tested in 4 hardware, all have this problem.

What problem? Exist template with cpanel?
