Subject: NFS server on VE
Posted by edbch21 on Tue, 12 Feb 2008 19:16:30 GMT

Hello

I want to share files (I need) via nfs (pnfs) from a VE. I'm so far cappable to mount directories fom HN in VEs. I have see the little article "nfs server on VE" but I don't find any information about howto patch the kernel to active nfs services inside VEs.
Thanks to any help.

You don't have to patch the kernel. The kernels in repo-s and in rpms already come with NFS support.
