Dear OpenVZ users and developer

WebVZ: A web management tool for openvz is released and available for download from
<http://webvz.sourceforge.net/index.html>

Please try it and report to me any suggestion, bug, comment or contribution.

Notice: you need Ruby on Rails to be installed on your machine in order to run it

screenshots are available here
<http://webvz.sourceforge.net/screenshots.html>

Best Regards
Shuaib Zahda

Thanks Kir for adding it.

I appreciate feedback from the people who downloaded the tool and tested it.

Thanks

Dear all,

I found that there would be a common error for those who use ruby on rails for the first time. The solution is easy
find the details in the download page.

<http://webvz.sourceforge.net/download.html>

Looks good, it would be real nice if it could support a pool of openvz servers and allow live migration of VEs between the openvz servers.

Yes, live migration will be in the next version (in one month time)
as well as user access and some other new features.

In case you use it please send me some feedback I will be more than happy to receive that
